CONTENTS

Volume 42, Issue Nos. 1–12 (2003)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 10 May

Finite volume/mixed finite element analysis of pollutant transport and bioremediation in heterogeneous saturated aquifiers: C. Gallo and G. Manzini 1

A flux-splitting solver for shallow water equations with source terms: T. Chacón, E. D. Fernández and M. Gómez 23

A novel fully-implicit finite volume method applied to the lid-driven cavity problem—Part I: High Reynolds number flow calculations: M. Sahin and R. G. Owens 57

A novel fully-implicit finite volume method applied to the lid-driven cavity problem—Part II: Linear stability analysis: M. Sahin and R. G. Owens 79

A new hybrid turbulence modelling strategy for industrial CFD: B. Basara and S. Jakirlic 89

Issue No. 2, 20 May

Annular liquid jets at high Reynolds numbers: G. Georgiou 117

Finite-element simulation of incompressible fluid flow in an elastic vessel: H. Y. H. Chen and T. W. H. Sheu 131

Calculation of turbulent fluid flow and heat transfer in ducts by a full Reynolds stress model: M. Rokni and B. Sundén 147

Computational study of unsteady turbulent flows around oscillating and ramping aerofoils: G. N. Barakos and D. Drakakis 163

An efficient method for capturing free boundaries in multi-fluid simulations: F. Xiao and A. Ikebata 187

Efficient discretization of pressure-correction equations on non-orthogonal grids: T. Lehnhäuser and M. Schäfer 211

Issue No. 3, 30 May

An efficient finite difference scheme for free-surface flows in narrow rivers and estuaries: XinJian Chen 233

Chebyshev super spectral viscosity solution of a two-dimensional fluidized-bed model: S. A. Sarra 249

Multidimensional FEM–FCT schemes for arbitrary time stepping: D. Kuzmin, M. Möller and S. Turek 265

Discretization of transport equations on 2D Cartesian unstructured grids using data from remote cells for the convection terms: J. S. Anagnostopolous 297

Spectral element method for viscoelastic flows in planar contraction channel: Sha Meng, XinKai Li and G. Evans 323

Issue No. 4, 10 June

A short note on the general boundary element method for viscous flows with high Reynolds number: X. Y. Zhao and S. J. Liao 349

Numerical investigation from rarefied flow to continuum by solving the Boltzmann model equation: Z.-H. Li and H.-X. Zhang 361

A spectral/finite-difference approach for narrow-channel flow with inertia: M. R. Siddique and R. E. Khayat 383

Analysis of the local truncation error in the pressure-free projection method for incompressible flows: a new accurate expression of the intermediate boundary conditions: P. Iannelli and F. M. Denaro 399

A theoretical Taylor-Galerkin model for first-order hyperbolic equation: T. W. H. Sheu and P. H. Lee 439

Issue No. 5, 20 June

CFD simulation of two- and three-dimensional free-surface flow: D. Apsley and W. Hu 465

A numerical study of the propulsion efficiency of a flapping hydrofoil: G. Pedro, A. Suleman and N. Djilali 493

Numerical simulation of the unsteady behavior of cavitating flows: O. Coutier-Delgosha, J. L. Reboud and Y. Delannoy 527

Development of a parallel storm surge model: J. R. Davis and Y. P. Sheng 549

Issue No. 6, 30 June

Reduced order state-space models from the pulse responses of a linearized CFD scheme: A. L. Gaitonde and D. P. Jones 581

Dispersion analysis of the least-squares finite-element shallow-water system: D. Y. Le Roux and G. F. Carey 607

A two-scale domain decomposition method for computing the flow through a porous layer limited by a perforated plate: J. Dufrêche, M. Prat and P. Schmitz 623

Numerical wave tank based on a σ-transformed finite element inviscid flow solver: M. S. Turnbull, A. G. L. Borthwick and R. Eatock Taylor 641

A time-implicit high-order compact differencing and filtering scheme for large-eddy simulation: D. P. Rizzetta, M. R. Visbal and G. A. Blaisdell 665

ERRATUM

Positivity-preserving, flux-limited finite-difference and finite-element methods for reactive transport, by Robert J. MacKinnon and Graham F. Carey 695

Issue No. 7, 10 July

Numerical simulation of three-dimensional free surface flows: V. Maronnier, M. Picasso and J. Rappaz 697

Numerical simulation of turbulent flow through series stenoses: T. S. Lee, W. Liao and H. T. Low 717

Dispersion and stability analyses of the linerarized two-dimensional shallow water equations in boundary-fitted co-ordinates: S. Sankaranarayanan and M. L. Spaulding 741

A new VOF-based numerical scheme for the simulation of fluid flow with free surface. Part I: New free surface tracking algorithm and its verification: M. S. Kim and W. I. Lee 765

A new VOF-based numerical scheme for the simulation of fluid flow with free surface. Part II: Application to the cavity filling and sloshing problems: M. S. Kim, J. S. Park and W. I. Lee 791

Issue No. 8, 20 July

A non-linear k–ε model with realizability for prediction of flows around bluff bodies: I. Kimura and T. Hosoda 813

Maintaining the stability of a leapfrog scheme in the presence of source terms: C. Kim 839

Numerical simulation of unsteady multidimensional free surface motions by level set method: W. Yue, C.-L. Lin and V. C. Patel 853

Adaptive strategy of transonic flows over vibrating blades with interblade phase angles: S. Y. Yang 885

Fourth-order finite difference scheme for the incompressible Navier–Stokes equations in a disk: M.-C. Lai 909

Effects of under-relaxation factors on turbulent flow simulations: R. M. Barron and A. A. Salehi Neyshabouri 923

Issue No. 9, 30 July

A fully hydrodynamic model for three-dimensional, free surface flows: XinJian Chen . 929

Development of optimized weighted-ENO schemes for multiscale compressible flows: D. Ponziani, S. Pirozzoli and F. Grasso 953

Near-wall turbulence modelling with enhanced dissipation: M. M. Rahman and T. Siikonen 979

Direct testing of subgrid scale models in large-eddy simulation of a non-isothermal turbulent jet: C. Ferreira Gago, F. Garnier and F. Utheza 999

A pseudo-viscoelastic approach for transient polymeric flow exiting a channel: R. E. Khayat and N. Ashrafi 1027

Issue No. 10, 10 August

Superconvergence and H(div) projection for discontinuous Galerkin methods: P. Bastian and B. Rivière 1043

Linearized and nonlinear acoustic/viscous splitting techniques for low Mach number flows: M. Farshchi, S. K. Hannani and M. Ebrahimi 1059

Steady/unsteady aerodynamic analysis of wings at subsonic, sonic and supersonic Mach numbers using a 3D panel method: Jeonghyun Cho, Cheolheui Han, Leesang Cho and Jinsoo Cho 1073

Numerical simulation of time-dependent hydrodynamic removal of a contaminated fluid from a cavity: Li-Chuan Fang, D. Nicolaou and J. W. Cleaver 1087

Numerical simulation of mold filling in foam reaction injection molding: Dongjin Seo, Jae Ryoun Youn and C. L. Tucker III 1105

Solution adaptive grids applied to low Reynolds number flow: G. de With, A. E. Holdø and T. A. Huld 1135

Issue No. 11, 20 August

A high-order finite difference method for incompressible fluid turbulence simulations: E. Vedy, S. Viazzo and R. Schiestel 1155

A three-dimensional contact algorithm for sliding surfaces: A. S. Dawes 1189

Modified method of characteristics for solving population balance equations: L. Pilon and R. Viskanta 1211

Influence of injection gate definition on the flow-front approximation in numerical simulations of mold-filling processes: D. Modi, P. Šimáček and S. Advani 1237

Discontinuous Galerkin spectral element lattice Boltzmann method on triangular element: X. Shi, J. Lin and Z. Yu 1249

Issue No. 12, 30 August

PRICE: primitive centred schemes for hyperbolic systems: E. F. Toro and A. Siviglia . . 1263

Evaluation of one- and two-equation low-*Re* turbulence models. Part I—Axisymmetric separating and swirling flows: M. I. Yaras and A. D. Grosvenor 1293

Evaluation of one- and two-equation low-*Re* turbulence models. Part II—Vortex-generator jet and diffusing S-duct flows: M. I. Yaras and A. D. Grosvenor 1321

Detecting instabilities in flows of viscoelastic fluids: N. Fiétier 1345

Methods for implementing the stream boundary condition in DSMC computations: C. R. Lilley and M. N. Macrossan 1363
